

I urge the FCC to reject the NAB's petition 04-160.  
XM Radio plays a big part in my daily life I feel that they and I should have the right to decide what content that I should receive as a subscriber. It provides me with services and content that are not available anywhere else.

I pay for the services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

This should be a non-issue. I am not even sure why they would be allowed to even bring this before the FCC.

If I remember correctly this is a free market society and competition is the spirit, the very essence of our economic system.

If the broadcasters feel threatened by the content of Satellite radio shouldn't they be more concerned with competing and improving their services instead of relying on the government to protect their business and attacking Satellite radio?

Please support XM's ability to provide the kind of programming that I demand and deserve and the very spirit of our economic system by letting them compete for my business.

Thank you,
